## EDUCATION:

---

### University of Calcutta

- **Bachelor of Technology: Computer Science and Engineering** | July '20 | 7.8 CGPA
- Bachelor of Science: Physics | May '17 | 68%

**St. Joseph's Convent** | ISC | 92.4%

## RELEVANT LANGUAGE AND SKILLS:

---

React JS, HTML5, CSS, Javascript, ES6, Node JS, Redux, Git, Material UI

## EXPERIENCE:

---

### **Cognizant Technology and Solutions: Jr. Software Developer | Remote | Nov '20 - Present**

Working as a **frontend developer** for a client website which will be used for maintaining, preparing and producing executive reports for seasonal samples.

Day to day responsibilities include:

- Developing fully responsive and dynamic pages capable of handling CRUD operations on dynamic fields of tables consisting of more than 20,000+ records.
- Responsible for optimization and refactoring of code to make them compliant with SonarCube standard.
- Integrating backend endpoints with the frontend and using Redux for state management.
- Following Agile Methodology and attending Scrum calls for updates.

### **Saletancy Pvt Ltd: Internship | Remote | Dec '18 - Feb '19**

-Designing, building and updating multiple web pages using vanilla JS, pure html and css and integrating them with the back-end.

## RELEVANT PROJECTS:

---

- **Group chat App** - Any authenticated user can enter the whatsapp-like group chat and engage in text messaging. (ReactJS, Javascript, Firebase realtime database and firebase APIs for backend)
- **Twitter Clone** - A twitter-like social media application where user can tweet, reply, like and view other's tweets. (ReactJS, Javascript, Material UI, Firebase realtime database and firebase APIs for backend)
- **Full Stack Social Media App** - An app where developers can create/update and delete their personal and professional details. Endpoints created using Node JS, using MongoDB database and React JS as a frontend library.

## CERTIFICATIONS:
