EXPERIENCE

- **Cognizant Technology and Solutions**
Software Engineer

Kolkata, India
Nov 2020 - Present

- Developed fully responsive web pages to perform CRUD operations on dynamic fields of tables capable of maintaining more than 2000+ data using Javascript, HTML, CSS, ES6, Material UI and ReactJS library.
- Refactored code to achieve significant optimization and performance enhancement while working with a high volume of data.
- Developed test cases using JEST framework and maintained SONAR standard.
- Awarded Cheer Points for exceptional performance and quality front-end solutions delivered before deadlines.

- **Saletancy Pvt Ltd**
Web Developer Intern

Remote
Dec 2018 -Jan 2019

- Created highly optimized SQL scripts and REST APIs using PHP for improved performance in managing client information in the database
- Developed custom libraries using Javascript for optimisation and code reusability.
- Redesigned user interfaces and ensured that the user experience of the application met at least 80% of users expectations.

RELEVANT PROJECTS

- **Twitter Clone** : Developed a Twitter-like UI using React JS, Redux and Firebase database. Users can login, update their profile, post tweets including reacting to and replying to other's tweets.
- **Group chat app using React JS**. - Any user after signing up with their email address or google authentication can enter a whatsapp-like chat room, chat with other members and can later sign out whenever required.
